# Deepak Behera

Bachelor of Technology (CSE)
GIET University, Gunupur, Odisha

+91 9178153588
db09762@gmail.com
LinkedIn — GitHub — LeetCode

## Education

| Year | Degree / Institute | Score |
|---|---|---|
| 2022–2026 | B.Tech in Computer Science, GIET University | CGPA: 8.20 |
| 2020–2022 | Intermediate (Science), GHVM (CBSE) | 80.5% |
| 2008–2020 | Schooling, Saint Thomas English School (ICSE) | 78.6% |

## Experience

**GeeksforGeeks Student Chapter, GIETU** 2024–2025
*Co-Lead – Branding and Designing* Gunupur, Odisha

- Led planning and execution of 10+ technical events and coding competitions impacting 300+ students.
- Conducted structured sessions on Data Structures, Algorithms, and AI fundamentals.
- Mentored junior developers and improved campus technical participation.

## Projects

- **VocalSync – AI Podcast Automation Platform** 2025
  Developed an end-to-end AI-powered podcast automation system that generates scripts using LLaMA-3, performs multilingual text-to-speech synthesis, and optimizes audio processing with FFmpeg. Designed scalable backend architecture and containerized services using Docker for efficient deployment.
  *Tech: Python, Node.js, LLaMA-3, Docker, SQLite, ChromaDB*
- **AI-Powered Health Monitoring & Herbal Remedy System** 2025
  Built a full-stack AI health analytics platform that analyzes symptoms using ML classification models and delivers personalized herbal recommendations. Integrated NLP chatbot for real-time interaction and intelligent response generation.
  *Tech: React.js, Node.js, MongoDB, Python, TensorFlow*
- **Environmental Impact Tracker** 2024
  Designed predictive environmental monitoring models using Random Forest, SVM, and Decision Trees to forecast environmental metrics. Developed interactive dashboards to enable data-driven decision support.
  *Tech: React.js, Node.js, MongoDB, Python*
- **Water Resource Management Tool** 2024
  Engineered a GIS-enabled predictive analytics platform for water optimization. Implemented forecasting models and monitoring dashboards to support sustainable resource planning and efficient allocation.
  *Tech: React.js, Node.js, MongoDB, Python*

## Technical Skills

- **Programming:** Python, Java, JavaScript, HTML
- **Frameworks:** Flask, Node.js, TensorFlow, Scikit-learn
- **Machine Learning:** Predictive Modeling, Classification  Regression, Feature Engineering
- **Databases:** SQL, MongoDB
- **Tools:** GitHub, Docker, VS Code, Streamlit, Gradio

## Certifications

- Microsoft Certified: Azure AI Fundamentals
- Machine Learning using Python – ArIES IIT Roorkee
- Industry 4.0 and IIoT – NPTEL
- Problem Solving Through Programming in C – NPTEL

## Honors & Achievements

- Research Publication – Leveraging Machine Learning for Environmental Impact Tracking
- 2nd Prize – Idea Presentation (Departmental Fest)
- Winner – Learnathon 4.0 (2025)
